

New Release November 2008

Handbook of Research on Social and Organizational Liabilities in Information Security

**Edited by: Manish Gupta and Raj Sharman,
State University of New York at Buffalo, USA**

13-digit ISBN: 978-1-60566-132-2

596 pages; 2009 Copyright

Price: US \$265.00 (hardcover*)

Pre-pub price[§]: US \$245.00

Perpetual Access: US \$400.00

Print + Perpetual Access: US \$530.00

Illustrations: figures, tables (8 1/2" x 11")

Translation Rights: World

*Paperback is not available. [§]Pre-pub price is good through one month after publication.

“This handbook aims to provide immense scholarly value and contribution to the fields of information technology, security and management.”

**- Manish Gupta, State University of
New York, USA**

As the diffusion and use of technology applications have accelerated in organizational and societal domains, behavioral and social dynamics have inevitably created the potential for negative as well as positive consequences and events associated with technology. A pressing need within organizations and societies has therefore emerged for robust, proactive information security measures that can prevent as well as ameliorate breaches, attacks, and abuses.

The Handbook of Research on Social and Organizational Liabilities in Information Security offers a critical mass of insightful, authoritative articles on the most salient contemporary issues of managing social and human aspects of information security. Aimed at providing immense scholarly value to researchers, academicians, and practitioners in the area of information technology and security, this landmark reference collection provides estimable coverage of pertinent issues such as employee surveillance, information security policies, and password authentication.

Subject:

IT Security/Ethics; Artificial Intelligence; IT Education; Electronic Business; Software/Systems Designs; Networking/Telecommunications

Market:

This essential reference is for all academic and research libraries, as well as all public administration and governmental libraries. All those interested in the social and organizational issues of managing information security will find this publication unrivaled. Researchers, academics, enterprise managers, and students in a full range of business and IT-related fields will also benefit.

Excellent addition to your library! Recommend to your acquisitions librarian.

Handbook of Research on Social and Organizational Liabilities in Information Security

Edited by: Manish Gupta and Raj Sharman, State University of New York at Buffalo, USA

Table of Contents

SECTION I: ORGANIZATIONAL SECURITY

Chapter I: Responsibilities and Liabilities with Respect to Catastrophes

Warren Axelrod, US Trust, USA

Chapter II: The Complex New World of Information Security

David Porter, Detica Corporation, UK

Chapter III: Employee Surveillance Based on Free Text Detection of Keystroke Dynamics

Ahmed Awad E Ahmed, University of Victoria, Canada

Issa Traore, University of Victoria, Canada

Chapter IV: E-risk Insurance Product Design: A Copula Based Bayesian Belief Network

Arunabha Mukhopadhyay, Indian Institute of Management Calcutta, India

Samir Chatterjee, Claremont Graduate University, USA

Debashis Saha, Indian Institute of Management Calcutta, India

Ambuj Mahanti, Indian Institute of Management Calcutta, India

Samir K Sadhukhan, Indian Institute of Management Calcutta, India

Chapter V: E-commerce Security and Honesty-credit

Lao Guoling, Shanghai University of Finance and Economics, China

Liping Wang, Shanghai University of Finance and Economics, China

Chapter VI: Towards a Scalable Role and Organization Based Access Control Model with Decentralized Security Administration

Zhixiong Zhang, The College Board, USA

Xinwen Zhang, Samsung Information System, USA

Ravi Sandhu, University of Texas at San Antonio and TriCipher Inc, USA

Chapter VII: Enterprise Information System Security – A Life-Cycle Approach

Chandan Mazumdar, Jadavpur University, India

Mridul S. Barik, Jadavpur University, India

Anirban Sengupta, Jadavpur University, India

Chapter VIII: An Alternative Model of Information Security Investment

Peter O. Orondo, Acclaim Consulting Group Inc., USA

SECTION II: PRIVACY AND SOCIAL ENGINEERING

Chapter IX: Avoiding Pitfalls in Policy-Based Privacy Management

George O.M. Yee, National Research Council, Canada

Larry Korba, National Research Council, Canada

Chapter X Privacy and Banking in Australia

Supriya Singh, RMIT University, Australia

Margaret Jackson, RMIT University, Australia

Jenine Beekhuizen, Griffith University, Australia

Chapter XI: A Multistage Framework to Defend Against Phishing Attacks

Madhusudhanan Chandrasekaran, State University of New York, Buffalo, USA

Shambhu Upadhyaya, State University of New York, Buffalo, USA

Chapter XII: A New Approach to Reducing Social Engineering Impact

Ghita Kouadri Mostéfaoui, Oxford University

Computing Laboratory, UK

Patrick Brézillon, LIP6, University Paris 6, France

Chapter XIII: Privacy-Enhancing Technologies

Yang Wang, University of California, Irvine, USA

Alfred Kobsa, University of California, Irvine, USA

Chapter XIV: Social Engineering and its countermeasures

Douglas P. Twitchell, Illinois State University, USA

Chapter XV: Social Networking Site: Opportunities and Security Challenges

Tom S. Chan, Southern New Hampshire University,

SECTION III: SECURITY EDUCATION AND AWARENESS

Chapter XVI: Designing Antiphishing Education

James W. Ragucci, Syracuse University, USA

Stefan A. Robila, Montclair State University, USA

Chapter XVII: Theories Used in Information Security Research: Survey and Agenda

Serkan Ada, State University of New York, Buffalo, USA

Raj Sharman, State University of New York, Buffalo, USA

Manish Gupta, State University of New York, Buffalo, USA

Chapter XVIII: Information Assurance and Security Curriculum Meeting the SIGITE Guidelines

Samuel P. Liles, Purdue University Calumet, USA

Reza Kamali, Purdue University Calumet, USA

Chapter XIX: Information Security Awareness

Gary Hinson, IsecT Ltd, New Zealand

Chapter XX: Creating a Security Education, Training, and Awareness Program

Nick Pullman, Citigroup, USA

Kevin Streff, Dakota State University, USA

Chapter XXI: Information Security within an E-learning Environment

E. Kritzinger, University of South Africa, Pretoria, SA

S.H von Solms, Rand Afrikaans University,

Johannesburg, SA

Chapter XXII: Research Notes on Emerging Areas of

Conflict in Security

Donald Murphy, M&T Bank Corporation, Buffalo, USA
Manish Gupta, State University of New York, Buffalo, USA

H. R. Rao, State University of New York, Buffalo, USA

SECTION IV: HUMAN AND INTERACTION ISSUES

Chapter XXIII: The Human Attack in Linguistic Steganography

C. Orhan Orgun, University of California, Davis, USA

Vineeta Chand, University of California, Davis, USA

Chapter XXIV: Using Technology to Overcome the Password's Contradiction

Sérgio Tenreiro de Magalhães, Faculdade de Ciências Sociais da Universidade Católica Portuguesa, University of Westminster, UK

Kenneth Revett, Departamento de Sistemas de Informação da Universidade do Minho, Portugal

Henrique M. D. Santos, Departamento de Sistemas de Informação da Universidade do Minho, Portugal

Leonel Duarte dos Santos, Departamento de Sistemas de Informação da Universidade do Minho, Portugal

André Oliveira, Departamento de Sistemas de

Informação da Universidade do Minho, Portugal

César Ariza, Bogomovil Ltda, Columbia

Chapter XXV: Formal Analysis of Security in Interactive Systems

Antonio Cerone, United Nations University, China

Siraj A. Shaikh, United Nations University, China

Chapter XXVI: Internet Crime: How Vulnerable Are You? Do Gender, Social Influence and Education Play a Role in Vulnerability?

Tejaswini Herath, State University of New York, Buffalo, USA

H. R. Rao, State University of New York, Buffalo, USA

Shambhu Upadhyaya, State University of New York, Buffalo, USA

Chapter XXVII: Detecting Skill Bidding in Online English Auctions

Jarrold Trevathan, James Cook University, Australia

Wayne Read, James Cook University, Australia

Chapter XXVIII: Information Security at Large Public Displays

Carsten Röcker, University of California, San Diego, USA

Carsten Magerkurth, SAP Research, Switzerland

Steve Hinske, Institute for Pervasive Computing,

Switzerland

Chapter XXIX: The Sense of Security and Trust

Yuko Murayama, Iwate Prefectural University, Japan

Carl Hauser, Washington State University, USA

Natsuko Hikage, Iwate Prefectural University, Japan

Basabi Chakraborty, Iwate Prefectural University, Japan

About the Editors:

Manish Gupta is an information security professional in M&T Bank, Buffalo and also a PhD candidate at the State University of New York, Buffalo. He received his bachelor's degree in mechanical engineering from the Institute of Engineering and Technology, Lucknow, India in 1998 and an MBA in information systems from the State University of New York, Buffalo, USA in 2003. He has more than ten years of industry experience in information systems, policies, and technologies. He has published three books in the area of information security and assurance. He has published more than 30 research articles in leading journals, conference proceedings and books including *DSS*, *ACM Transactions*, *IEEE*, and *JOEUC*. He serves in editorial boards of eight international journals and has served in program committees of several international conferences. He is listed in Cambridge *Who's Who Among Executives and Professionals*, 2007 and *Who's Who among students in American Universities and Colleges*, 2003. He holds several professional designations including *CISSP*, *CISA*, *CISM*, *ISSPCs*, and *PMP*. He is a member of *ACM*, *AIS*, *IEEE*, *INFORMS*, *APWG*, *ISACA*, and *ISC2*. He is recipient of 2008 ISC2 information security scholarship.

Raj Sharman is an associate professor in the Management Science and Systems Department at SUNY Buffalo, NY. He received his B. Tech and M. Tech degree from IIT Bombay (India) and his M.S degree in Industrial Engineering and PhD in Computer Science from Louisiana State University. His research streams include information assurance, extreme events, and improving performance on the Web. His papers have been published in a number of national and international journals. He is also the recipient of several grants from the university as well as external agencies. He serves as an associate editor for the Journal of Information Systems Security.
